

Bognár Kati

UX / UI DESIGNER

Skills

- Empathy-based design
- Systems thinking
- Prioritizing under pressure
- UX audit & heuristic evaluation
- Wireframing & prototyping
- User research fundamentals
- HTML/CSS basics
- Basic Git version control (VS Code)

Languages

Hungarian	Native
German	Fluent (C1)
English	Upper-Int. (B2)

Tools

Figma, Framer, VS Code (with Git), AI tools (MidJourney, Stitch, Google AI Studio, VO, MagicPatterns, Lovable, Claude Code)

Education

- 2025 – 2026**
UI Academy, UX/UI Design course
- 2007 – 2010**
ELTE, German minority teacher

Profile

Career-changer UX/UI designer with a background in teaching. Twelve years of teaching and raising four children strengthened my ability to simplify complexity, communicate clearly, and prioritize under pressure. After completing the UI Academy UX/UI program, I conducted a **freelance** UX audit for a real client and built this portfolio using Figma and **AI-assisted coding** tools with basic Git version control in VS Code.

Projects

2026 Portfolio Website (bognarkati.hu)

Mentored by Gordon Kristóf Dér (initial guidance)
Built and launched a **live portfolio site** beyond static design files. My mentor introduced me to the tools (VS Code, GitHub) and we set up the **custom domain** together; from there, I worked independently through many iterations, applying what I'd learned, over about six weeks.

2026 Square One

UI Academy Project
A conceptual fintech mobile app designed to make financial literacy accessible for Gen Z (ages 16–28). Followed the full **double diamond process**, including user research, persona development and ideation, resulting in a high-fidelity **Figma prototype** validated through **user testing**.

2025 Pacemakers

UI Academy Project
UI design for a running community platform, built on a provided wireframe and brief. **Focused on visual language** and mood: a black-and-lime neon palette inspired by evening city runs, using **AI-generated** imagery to support the concept.

Freelance / Client Work

2026 Freelance UX Auditor

- Mentored by Gordon Kristóf Dér
- Conducted a UX audit on a live **e-commerce**/mobile platform (client project, NDA) using **Nielsen's heuristics** plus mobile- and e-commerce-specific extensions
 - Completed a self-directed mentorship exercise: identified pain points within a personal-expertise domain and conceived a solution, laying the foundation for an app idea (**Kapocs**)

Previous Roles

2010 – 2022 Teacher

- German language teacher, elementary school
- Simplified complex material for young learners; managed competing priorities under pressure
